DETAILED ACTION

This Office Action is in response to the election filed 4 January 2005.

Election/Restrictions

Claims 9-18 are withdrawn from further consideration pursuant to 37 CFR 1.142(b) as being drawn to a nonelected method of making a semiconductor device, there being no allowable generic or linking claim. Election was made **without** traverse in the reply filed on 4 January 2005.

Applicant's election without traverse of claims 1-8 in the reply filed on 4 January 2005 is acknowledged.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1-8 are rejected under 35 U.S.C. 102(b) as being anticipated by Matsuzaki et al. (U.S. Patent 5,493,136).

Matsuzaki discloses a field effect transistor (Figs. 4,5 and 14) that contains a silicon channel layer (23) that is formed on a predetermined semiconductor layer (22) which is a gallium buffer layer, where the channel layer has an impurity concentration or composition ratio of $1 \times 10^{16}/\text{cm}^3$ or higher varying from low value to high value (Column
